Objective

Aspiring .NET Developer with hands-on experience in building scalable web applications using ASP.NET Core and RESTful APIs. Passionate about backend development, database optimization, and clean code architecture. Seeking to contribute to innovative projects and grow as a professional developer.

Education

Bachelor of Computer Science, Modern Academy in Maadi

Department of Computer Science – Graduation Date: 2026

Experience

Employee Management System

ASP.NET Core MVC – SQL Server – Entity Framework Core – Identity – JWT

- Built a full-stack web application using ASP.NET Core MVC for managing employee data
- Implemented full CRUD operations for employee records with role-based access
- Integrated secure authentication & authorization using ASP.NET Identity and JWT
- Secured login system used by
- Allowed users to update profile details and change/upload profile pictures
- Developed Forgot Password and Reset Password functionality using tokenized email links
- Followed clean architecture principles, applied form validation

E-Commerce RESTful API

ASP.NET Core Web API – Entity Framework Core – SQL Server – Clean Architecture

- Designed a scalable e-commerce API including product catalog, categories, cart, orders, and user management
- Applied Repository Pattern and Unit of Work for clean, testable code
- Integrated JWT-based authentication & role-based authorization (Admin, User)

- Implemented search, filter, pagination, and sorting for products Handled pagination, filtering,
 - Handled secure checkout, order history, and user-specific data access
 - Followed RESTful standards and ensured API documentation using Swagger
-

Technical Skills:

- C#, OOP, ASP.NET Core, Entity Framework Core, RESTful APIs, SQL, LINQ
- HTML, CSS, JavaScript, Bootstrap
- Git , GitHub, Swagger, Postman

Soft Skills:

- Problem Solving, Team Collaboration, Time Management, Adaptability, Attention to Detail
-

Courses

Back-End .NET Developer Intern, Route Academy

April 2025 – Present

- Developed RESTful APIs using ASP.NET Core and Entity Framework
 - Handled user authentication, authorization, and database operations with SQL Server
 - Collaborated with front-end teams to integrate APIs and debug effectively
 - Practiced version control using Git and worked on multi-developer projects
 - Studied full-stack development with a focus on ASP.NET Core (Back-End)
 - Built end-to-end web applications integrating C#, Web APIs, and modern UI frameworks
 - Gained exposure to software engineering principles and agile methodologies
 - Completed practical assignments simulating real-world business logic
-

Languages

- Arabic – Mother Tongue
- English – Working Proficiency
